The coordinates of the object discussed in that paper (A&A, 400, 137) are erroneously given. The actual coordinates are $\alpha(2000) = 0^h48^m05.3^s$, $\delta(2000) = -25°17'45''$. Accordingly, the correct denomination of the object following IAU nomenclature is J004805.3-251745. The object is correctly identified in Figure 2 of the paper.

The authors wish to express their gratitude to Dr. Ralf Scholz for kindly having pointed out the mistake to them.
