

My name is Vania Vicenzi, I am from a small village near Lugano in the southern part of Switzerland named Canton Ticino, where the official language is Italian.

I am very interested to participate at ESO Camp; this is a great opportunity to me for increasing my knowledge in astronomy, which is one of my passions.

The unknown and the uncharted has always fascinated me and in a world where still little to discover the much unexplored is out of our planet.

I often ask myself about the universe and what is out there; furthermore, I think that could be a good start to study astronomy in order to discover it. In fact, my actual education is including physics and application to mathematics with additional lectures as needed.

I believe to focus my final report at the college on astronomy.

I looking forward to meet all the other students at the ESO Camp next time!

Best regards

Vania Vicenzi
Student at the III Class, Liceo di Lugano 2,
Mezzovico, Switzerland, 2014, November 2nd.
