

The NEON Archive Observing School

European Southern Observatory, July 14-24 2004

The Cone Nebula as 'seen' with Digitized Sky Survey 2 and SIMBAD

The European Southern Observatory, Space Telescope-European Coordinating Facility, Asiago Observatory (Italy), Calar Alto Observatory (Germany – Spain), Haute Provence Observatory (France) and La Palma Observatories (ING and NOT, UK – Netherlands – Spain and Nordic Countries), announce the first NEON Archive Observing School.

The purpose of the school is to provide the opportunity to gain practical experience in observational astrophysics via archival research, data-reduction and analysis, including virtual observatory tools. The research projects, centered on selected astrophysical topics, will be carried out in small groups under the supervision of experienced astronomers, and complemented by lectures on general observational techniques and archival research for both ground and space astronomy.

The school is open to Astronomy PhD students in preference and Postdocs, from all over Europe.

The application deadline is April 30th, 2004.
