

Summary Information Sheet THE EARTH

The Earth is the third planet from the Sun and is the only planet known to support life. Equally unique is the presence of a large amount of water in different conditions: liquid in lakes, rivers and oceans, frozen as ice and vapour in clouds. It gives Earth its blue colour and so our planet also is called the Blue Planet.

Rocky upper mantle
640 km thick with
convection streams
which move the plates

Rocky inner mantle
2290 km thick with
convection streams

Molten outer core
1820 km thick

Solid inner core
7600 km diameter

Pacific Ocean
Part of the watershell
Hydrosphere 4 km

Continental and
ocean crust boundary

Magnetic field, shield and polar lights

North Polar ice cap (frozen ocean)

Mid- ocean ridge
plate boundary

Crust
- oceanic 10 km thick
- continental 40 km
The crust is divided in
about a dozen plates
which are moving

Electrical currents in
the core produce
the magnetic field

~70 km thick
Atmosphere
composed of
78% nitrogen
21% oxygen
0,9% argon
0,03% carbon
dioxide

Atmosphere

One revolution
around the Sun
lasts 365 days

South Polar icecap
(frozen continent)

Inclination of the Equator
to orbital plane 23,5°

Earth and seasons

Earth's crustal plates

Plate tectonics
