<p>[Visual starts]</p> <p>New ESOcast intro</p>	<p>New ESOcast introduction Incl ESO logo</p>
<p>Title: Starstruck by the Small Magellanic Cloud</p>	
<p>1. Prepare to be starstruck — by the biggest infrared image ever taken of the Small Magellanic Cloud.</p>	
<p>2. Visible-light telescopes struggle to see through the thick clouds of interstellar dust shrouding many galaxies.</p>	
<p>3. But the infrared vision of ESO's VISTA telescope opens up a whole new world.</p>	
<p>4. This dazzling new giant image of our galactic neighbour is filled with millions of stars...</p> <p>...thousands of background galaxies...</p> <p>...and lots of bright star clusters.</p>	
<p>5. This is the Small Magellanic Cloud as you've never seen it before.</p>	
<p>[Outro]</p>	<p><i>Produced by ESO, the European Southern Observatory. Reaching new heights in Astronomy.</i></p>
