

Script for ESOcast Light 180: The Pirate of the Southern Skies

ESOcast Light 180	
[Visual starts] New ESOcast intro	New ESOcast introduction
Title: The Pirate of the Southern Skies	
1. This young, bright, burning formation is part of the ominous nebula nicknamed the Skull and Crossbones Nebula .	
2. In fact, it is not one nebula at all, but several, which happen to align to form a sinister face .	
3. The new image taken by ESO's Very Large Telescope and released in time for Halloween delves into the gaping mouth of the skull .	
4. Officially known as NGC 2467, this young stellar nursery is to be found in the constellation Puppis — which translates to poop deck.	
5. Puppis was once joined with the constellations Carina and Vela to make the giant constellation Argo Navis — the Ship Argo .	
00:00 [Outro]	<i>Produced by ESO, the European Southern Observatory. Reaching new heights in Astronomy.</i>
