

Script for ECL 262 : Meingast VISTA star forming regions

ESOcast Light 262	
[Visual starts] New ESOcast intro	New ESOcast introduction
Title: Hidden Views of Vast Stellar Nurseries	
1. Using ESO's VISTA telescope, astronomers have created a vast infrared atlas of five nearby stellar nurseries .	
2. These cosmic panoramas were created by piecing together more than a million images covering an extensive area of the sky .	
3. Infrared light pierces through clouds of dust revealing young stars in the making .	
4. Astronomers will use this atlas to decipher the complex puzzle of stellar birth .	
5. "These images will allow us to understand the processes that transform gas and dust into stars." Stefan Meingast, the University of Vienna, Austria.	

[Outro]	<i>Produced by ESO, the European Southern Observatory. Reaching new heights in Astronomy.</i>
