# The Library webpage

The screenshot shows the ESO website's navigation menu with 'Science' highlighted. The 'Science Users Information' section is expanded, showing a list of services including 'Library, Documentation & Information Services' and 'Vacancies'. A news announcement is visible, titled 'First data release of the deep MUSE mosaic from the Large Programme', dated 14 Feb 2023. The announcement text reads: 'This is the first data release, DR1 of the IFS deep cube obtained in the MUSE Ultra Deep Field (MUDF) as part of the Large Programme ID 1100.A-0528, PI M. Fumagalli.' A 'Go to Announcement' link is present at the bottom right of the announcement box.

Home

The ESO Library team is happy to help you with all information requests you may have.

Information on how to use the library can be found at <https://www.eso.org/sci/libraries/about.html>. The ESO Libraries homepage is located at <https://www.eso.org/sci/libraries/>

The catalog contains records of all library items, including electronic books and journals. For online resources, direct access is provided from within the catalog. Most e-journals can also be reached from our [e-journals page](#). If you would like to consult specific books or articles which are currently not included in our holdings, please [send us a note](#).

Borrowing library material is easy: just use the **Self Checkout** button next to the search field. Use your email address (without @eso.org) as user ID and password and enter the ID (barcode number on the back of the cover page of books, e.g., ML 1994 123456) of the item you want to borrow. We are not applying strict loan periods; you can lend items until another user needs them, provided you keep them in your office. Please do not take library items home or on trips.

The main features of the new catalog are summarized in a [flyer](#).

In order to locate books in the libraries (currently only Library Garching), please refer to the floor plans below.

### Publication Digest

In 2012, the ESO user community published over 670 refereed papers, the highest number ever in a single year (see top right figure). This brought the total number of papers using ESO data from 1996-2012 to 3455. An overview of publication numbers can be found at [http://www.eso.org/libraries/telbib/publications\\_overview.html](http://www.eso.org/libraries/telbib/publications_overview.html). The statistics are linked to the corresponding records in the telescope bibliography (telbib) database.

More than 10 000 articles from selected astronomy journals (A&A, A&AS, AJ, ApJ, ApJS, AN, ARA&A, EM&P, ExA, IAGLR, MNRAS, Nature, PASP, PNAS and U) during 2012 in order that use data from instruments to achieve results. Approximately 1000 articles are qualified for inclusion.

The VLT/VLTI provide peer-reviewed papers that could be seen in the top right figure a plateau has not yet an average number.

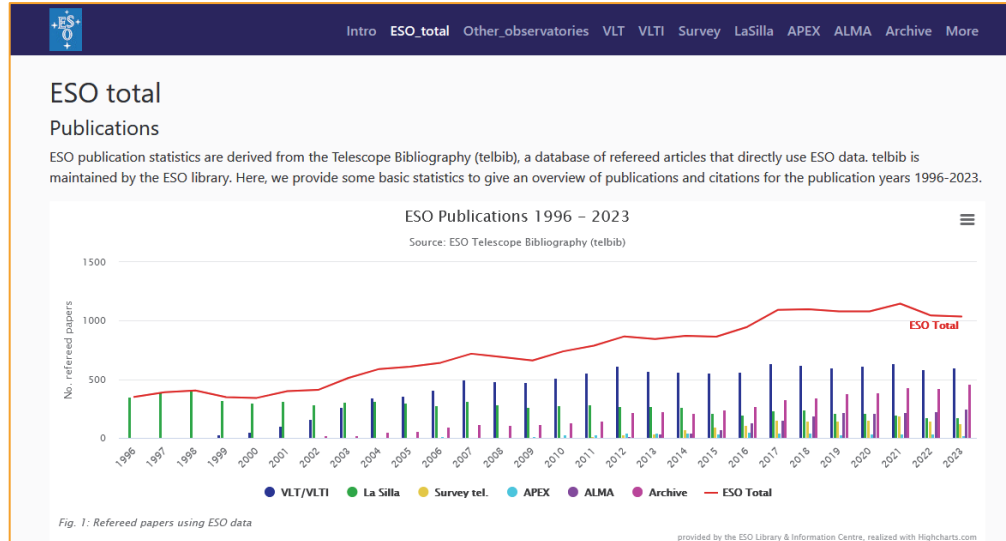

**Fig. 1: Refereed papers using ESO data**

## telbib Publication Statistics Overview

ESO publication statistics are derived from the Telescope Bibliography (telbib), a database of refereed papers that directly use ESO data. For further information, see the [Statistics](#) which is available from the [ESO Libraries homepage](#).

Publication statistics given in the table below are linked to the corresponding papers in telbib.

	VLT / VLTI	La Silla	Survey tel	APEX	
1996		350			
1997		389			
1998		405			
1999	29	324			
2000	52	300			
2001	105	316			
2002	159	288			
2003	260	305			
2004	342	316			
2005	359	296			
2006	413	279		12	
2007	495	312		1	
2008	486	289		8	
2009	472	260		15	
2010	510	276	2	28	
2011	555	286	13	27	
2012	614	271	30	40	16
2013	565	273	38	44	40
2014	563	267	73	47	47

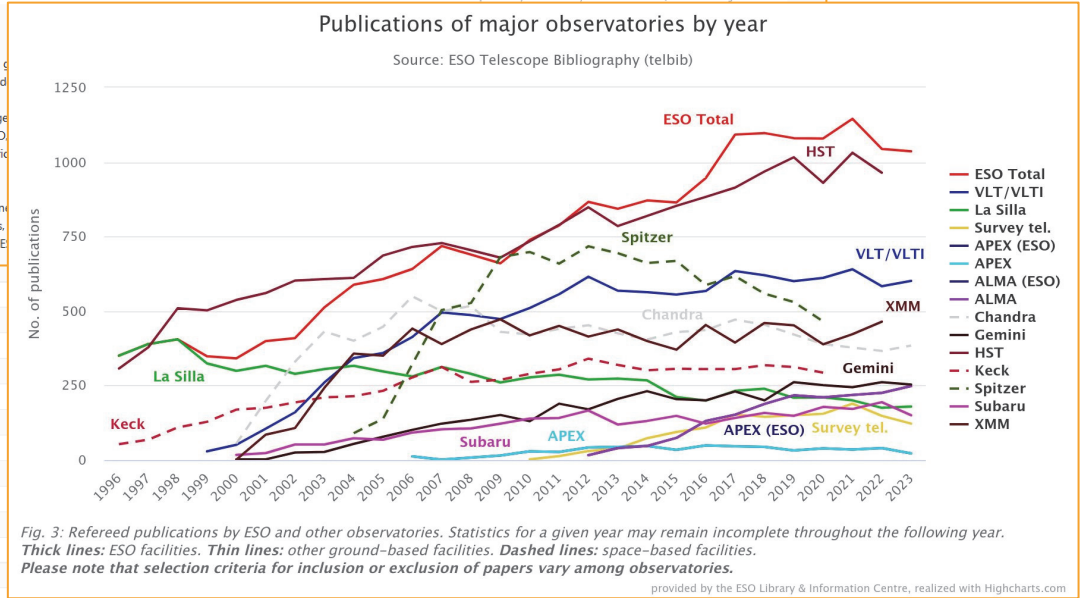

#### Notes:

**VLT/VLTI:** papers using data obtained during 'private' period of observing time is recommended by ESO.

**La Silla:** papers using data obtained during 'private' period of observing time is recommended by ESO.

**APEX:** papers using data generated by ESO, e.g., APEX P-Artemis, based (entirely or partly) on ESO data.

# Publishing with ESO data

<http://www.eso.org/sci/observing/policies/publications.html>

The screenshot shows the ESO website's 'Publications based on ESO Data' page. The page header includes the ESO logo, the text 'European Southern Observatory', and the slogan 'ESO — Reaching New Heights in Astronomy' with a row of international flags. A navigation bar contains links for 'Public', 'Science', 'User Portal', 'Intranet', 'Contact', 'Site Map', a search box, and a 'Go!' button. Below the navigation bar is a breadcrumb trail: 'Science Users Information > Observing with ESO Telescopes > Policies and Procedures > Publications with ESO Data', dated '17 Feb 2023'. A left-hand sidebar lists various categories under 'Science Users Information', with 'Publications with ESO Data' highlighted. The main content area is titled 'Publications based on ESO Data' and contains the following text:

Based on the FAIR principles to make data Findable, Accessible, Interoperable, and Reusable, publications making use of ESO observational data must include the following statement in a footnote or in the acknowledgement:

**Based on observations collected at the European Southern Observatory under ESO programme(s) TP.C-NNNN(R)\* or PPP.AAAA.nnn\*\* and/or data obtained from the ESO Science Archive Facility with DOI(s) under [https://doi.org/10.18727/archive/NNN\\*\\*\\*](https://doi.org/10.18727/archive/NNN***)**

Please substitute the place-holder (TP.C-NNNN(R) or PPP.AAAA.nnn) with the programme ID(s) of the data used, e.g., 094.A-1234(A) or 105.20UA.001. You will find the identifier in the FITS header of the observations.

Refereed papers that use partly or exclusively data from ESO facilities are included in the ESO Telescope Bibliography (telbib, [telbib.eso.org](http://telbib.eso.org)), a database curated by the ESO Library and Information Centre.

For more detailed information about ESO's data access and acknowledgement policy, please see <https://archive.eso.org/cms/eso-data-access-policy.html>

\* all programmes approved before ESO period 105: TP.C-NNNN(R)  
T: leading character indicating the programme type (0=Normal, 1=Large, ...)  
P: period (2 digits for P<100, 3 digits for P>=100)  
C: category (A, B, C, D, L, ...)  
NNNN: four digit integer (unique within each semester)  
R: run (A, B, ...)

Annotations on the page include:

- An orange box highlights the citation template: **Based on observations collected at the European Southern Observatory under ESO programme(s) TP.C-NNNN(R)\* or PPP.AAAA.nnn\*\* and/or data obtained from the ESO Science Archive Facility with DOI(s) under [https://doi.org/10.18727/archive/NNN\\*\\*\\*](https://doi.org/10.18727/archive/NNN***)**
- Two orange lines point from this box to the text: **ESO authors are "Ambassadors" for proper data citation**
- At the bottom, orange text reads: **Please mention ESO + programIDs and/or Data DOIs in your papers**
