

A SYNOPTIC VIEW OF THE MAGELLANIC CLOUDS:
VMC, GAIA AND BEYOND

ESO-HQ, GARCHING BEI MÜNCHEN, GERMANY
September 9-13, 2019

Atomic gas Content and Kinematics of the Magellanic System

**McClure-Griffiths Naomi, Australian National
University**

In this talk I will present an overview of the known atomic gas distribution and kinematics of the Magellanic System, including the Clouds themselves and the Stream. I will focus in particular on upcoming surveys that will dramatically increase the sensitivity and angular resolution of atomic hydrogen data in the Magellanic Clouds.
