The Advanced School on “Extraspolar Planets and Brown Dwarfs” is organized by: Catolica/Princeton, European Southern Observatory, and FONDAP Center for Astrophysics.

Local and Scientific Organizing Committee members are:
- Dante Minniti (University Catolica)
- Danielle Allain (European Southern Observatory)
- Maria Teresa Ruiz (Universidad de Chile)
- Grzegorz Pietrzyński (University de Concepción)

The main lecturers will be:
- France Allard (ENS Lyon)
- Gillian Knapp (Princeton University)
- Michel Mayor (Geneva Observatory)
- Scott Tremaine (Princeton University)

The lectures will cover the following themes:
- Observations of brown dwarfs, searches, classification, main properties.
- Search for extrasolar planets, main discoveries, future prospects.
- Theory of extrasolar planetary systems, formation, dynamical models.

In addition, a number of short invited talks are planned on the topic of the School, and participants are welcome to present posters.

The Advanced School lectures will be aimed at graduate students of Astronomy. Interested participants will find information on the School webpage, http://www.astro.puc.cl/school, and should fill in an expression of interest form to be emailed back to school@astro.puc.cl before September 30, 2003. Financial aid is available upon request. A Second announcement will be sent shortly thereafter.
