

ESO is the European Organisation for Astronomical Research in the Southern Hemisphere. Whilst the Headquarters (comprising the scientific, technical and administrative centre of the organisation) are located in Garching near Munich, Germany, ESO operates three observational sites in the Chilean Atacama desert. The Very Large Telescope (VLT), is located on Paranal, a 2 600 m high mountain south of Antofagasta. At La Silla, 600 km north of Santiago de Chile at 2 400 m altitude, ESO operates several medium-sized optical telescopes. The third site is the 5 000 m high Llano de Chajnantor, near San Pedro de Atacama. Here a new submillimetre telescope (APEX) is in operation, and a giant array of 12-m submillimetre antennas (ALMA) is under development. Over 1600 proposals are made each year for the use of the ESO telescopes.

The ESO MESSENGER is published four times a year: normally in March, June, September and December. ESO also publishes Conference Proceedings and other material connected to its activities. Press Releases inform the media about particular events. For further information, contact the ESO Public Affairs Department at the following address:

## Contents

### Telescopes and Instrumentation

H.-U. Käufel et al. – CRIRES: Commissioning of the MACAO Adaptive Optics Module and General Status Report	2
R. Bacon et al. – Probing Unexplored Territories with MUSE: a Second-Generation Instrument for the VLT	5
G. Marconi et al. – New, Efficient High-Resolution Red VPH Grisms in VIMOS	11
R. Güsten et al. – The Atacama Pathfinder Experiment	12
T. Wilson – ALMA News	18
A. Moorwood – The 2006 SPIE Symposium on Astronomical Telescopes and Instrumentation – Observing the Universe from Ground and Space	19

### Reports from Observers

A. Zijlstra et al. – The Compact Discs of Post-AGB stars	21
M. I. Wilkinson et al. – Probing the Dark Matter Content of Local Group Dwarf Spheroidal Galaxies with FLAMES	25
A Three-Planet Extrasolar System	29
D. Proust et al. – The Shapley Supercluster: the Largest Matter Concentration in the Local Universe	30
F. Courbin et al. – The Host Galaxies of the Brightest Quasars: Gas-Rich Galaxies, Mergers, and Young Stars	32

### Other Astronomical News

R. M. West – André B. Muller (25.9.1918–1.4.2006)	37
C. Madsen – Finnish Parliamentary Committee at ESO Headquarters	38
T. Richtler, S. S. Larsen – Report on the ESO-FONDAP Conference on Globular Clusters – Guides to Galaxies	39
Fellows at ESO – A. Lundgren, V. Reveret	41
C. Madsen – Walloon Space Days	42
D. Pierce-Price – Schoolchildren Worldwide Compete to “Catch a Star!”	43
S. Uttenthaler et al. – A Solar Eclipse Expedition to Turkey	44

### Announcements

2007 ESO Instrument Calibration Workshop	45
Towards the European Extremely Large Telescope	45
ESO Fellowship Programme 2006/2007	46
Personnel Movements	47
List of Proceedings from the ESO Astrophysics Symposia	47

Front Cover Picture: Spiral Galaxy NGC 4565

This image is based on data obtained by FORS1 and FORS2 at the VLT. The data were extracted from the ESO Science Archive and further processed by Henri Boffin (ESO). They are based on exposures made through four optical filters – *B*, *V*, *R* and *I*. More information can be found in ESO PR Photo 24a/05.
